

MPM Consortium Governance Bylaws

1. Purpose and Authority of the Consortium

The Mechanical Power Module Consortium (MPMC) is the sovereign standards body responsible for defining, maintaining, and governing the Mechanical Power Module (MPM) Standard. Its authority derives from:

- The **MPM Charter**
- The ratification of **MPM Standard v1.0**
- The delegated powers of the **Standards Board, Compliance Authority, and Deployment Council**

The Consortium exists to ensure global interoperability, safety, and sovereign manufacturing capability for mechanical power systems.

2. Organizational Structure

MPMC consists of three governing bodies:

- **Standards Board** — Technical authority over the specification
- **Compliance Authority** — Certification, testing, and conformance
- **Deployment Council** — Regional adoption and manufacturing alignment

Each body operates under delegated authority defined in these bylaws.

3. Membership Classes

MPMC recognizes four membership classes:

- **Founding Members** — Signatories of Charter v1.0
- **Voting Members** — Entities with Standards Board representation
- **Non-Voting Members** — Observers, academic institutions, NGOs
- **Technical Contributors** — Individuals or organizations contributing to the standard

Membership rights include participation, proposal submission, and access to draft specifications.

4. Voting Rights and Quorum

4.1 Standards Board

- Simple majority for technical changes
- Supermajority ($\frac{2}{3}$) for safety envelope modifications
- Founder-Architect retains veto authority on mechanical interface geometry, safety envelope, and licensing model

4.2 Compliance Authority

- Simple majority for certification rule changes
- Supermajority for dispute resolution rulings

4.3 Deployment Council

- Simple majority for regional adaptations
- No authority to modify the core standard

Quorum is defined as **50% + 1** of seated members.

5. Ratification and Versioning

All new versions of the MPM Standard require:

- Standards Board approval
- Compliance Authority review
- Deployment Council acknowledgment
- Publication through the official MPMC repository

Versioning follows the **MPM Versioning Rules**.

6. Intellectual Property and Licensing

MPM is governed under a sovereign licensing model:

- The mechanical interface geometry is open and royalty-free

- Derivative modules require certification
- Compliance Authority enforces licensing terms
- Founder-Architect retains permanent veto on licensing changes

7. Conflict Resolution

Conflicts between members or governing bodies are resolved by:

1. Mediation within the Compliance Authority
2. Binding arbitration by the Standards Board
3. Final appeal to the Founder-Architect (limited to safety and geometry disputes)

8. Dissolution and Succession

MPMC may dissolve only by:

- Unanimous vote of the Standards Board
- Supermajority of the Compliance Authority
- Approval of the Founder-Architect

Succession rules ensure continuity of the standard.
